

# St. Louis C++ MeetUp

July 10, 2019 meeting

# Presentations

- We need people to give presentations!
- Presentations need not run a whole session, smaller topics are fine
- If you're looking for mentoring, let us know
- Second Wednesday scheduling for the foreseeable future. Next meeting, August 14, location TBD

# Locations

- Current options are OCI, T-REX
- We're open to sponsors and other locations

# C++ News

- C++Now videos are on YouTube. All the featured talks and at least some of the lightning talks are there now. Check the BoostCon channel.
- CppCon is Sept. 15-20 in Aurora (Denver), Colorado, and includes featured talks by Stroustrup, Alexandresceau, Sutter among others
- The C++ committee meets in Cologne, Germany next week. Expectation is to adopt or reject remaining features which were “design-approved” but not yet formally adopted, and to launch the international comment ballot for C++20.
